品质机械制造商 全套系统解决方案
Quality Machinery Manufacturer's Complete System Solution

公司简介

Company Profile

浙江天卫机械制造有限公司坐落于美丽的沿海城市浙江温州。本公司专注生产与研发全自动多工位金属冷成型机，是集科研，开发，生产，销售，服务为一体的综合型企业。

公司产品包括三模三冲、四模四冲、五模五冲、六模六冲，以及各种加长，特长多工位冷镦机。我们的产品广泛用于标准紧固件、建筑五金、汽摩配零部件、非标件螺栓的制作生产。我们的产品具有精度高，节能低耗高效，结构合理，调试方便，后期维修方便，新客户易上手，性价比高等优势。

自成立以来，我们发挥自身优势，健全销售网络，注重企业形象和优良的售后服务，并且不断完善加工生产的配套设施，赢得广大客户的一致好评。

本公司秉承“以质量求生存，以服务求发展”的精神参与到激烈的市场竞争中来，以一流的产品质量，优惠的产品价格，令人满意的客户服务，赢得您的支持和信赖。我们相信，通过我们不懈的努力和创新，我们能够在冷镦机领域取得更加卓越的成就，为客户创造更多的价值。

Zhejiang Tianwei Machinery Manufacturing Co., Ltd. is located in the beautiful coastal city of Wenzhou, Zhejiang. Our company specializes in the production and research & development of fully automatic multi-station cold heading machines. We are a comprehensive enterprise integrating research, development, production, sales, and services.

Our company's products include three stations, four stations, five stations, six stations, as well as various elongated cold heading machines. Our products are widely used in the production of standard fasteners, building hardware, automotive and motorcycle parts, and non-standard bolts. Our products have the advantages of high precision, energy saving, low consumption, high efficiency, reasonable structure, easy debugging, easy maintenance, and easy operation for new customers.

Since our establishment, we have leveraged our own advantages, established a sound sales network, focused on corporate image and excellent after-sales service, and continuously improved the supporting facilities for processing and production, winning unanimous praise from our customers.

Our company adheres to the spirit of "compete by quality, develop by service". We strive to win your support and trust with first-class product quality, preferential product prices, and satisfactory customer service. We believe that through our unremitting efforts and innovation, we can achieve more outstanding achievements in the field of cold heading machines and create more value for our customers.

企业文化

Culture of company

企业宗旨:和谐为一，仁慈无限。

企业经营理念:以人为本，以法治厂，以质兴企，不断创新。

企业发展观:诚信是基石，质量是动力，团结、合作才有出路。

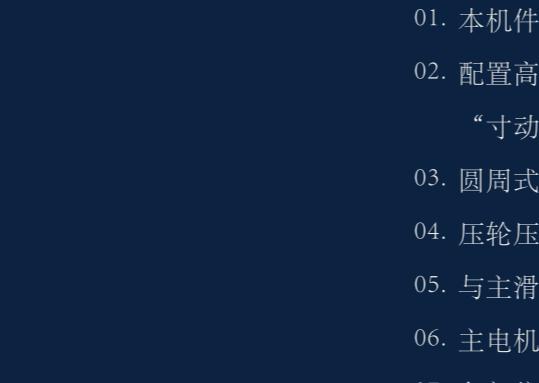

企业使命:跻身国内自动冷镦机行业前三甲，成为螺丝制造商不可多得的合作伙伴。

以人为本:生产力中的第一要素，他既是企业的主体，也是企业管理的核心。天卫机械从“建厂先育人”的人才理念到“天卫是一所学校，更是一个温暖的家”的文化内涵，都把人放在企业管理的首要位置，仅仅围绕全心全意服务员工和全心全意开导员工的思想，开展文化建设工作，努力去应在一种对内充满活力，具有强大凝聚力，对外深得客户信任，赢得八方支持的一种文化氛围。

以法治厂:强调了天卫公司标准化建设的严肃性。标准就是企业的“法律”，企业的一切活动都要在标准的框架内进行，“标准老大，总经理老二，标准面前人人平等”这是天卫标准化建设的一贯准则。董事长认为，以“法治”代替“人治”，可以克服因个人意志、感情、思想偏差、分析错误而造成企业发展的波动，建立了一套科学、合理的标准来管理企业，规范员工的行为，这有利于保证企业长期、稳定的发展。

以质兴企:质量就是企业的生命，产品代表人品。“天卫”人不考虑如何应付和压倒对手，而是专注于如何从产品质量上全面领先所有的竞争对手。因为“天卫”人认为在市场经济中，竞争对手永远存在，只有精于管理，提升产品技术含量才是主导市场的关键。天卫公司始终坚持“向社会提供精品”的质量方针，以质量求生存以信誉求发展，不断加大技术改造和新产品的研发投入，把质量当作企业生存、发展的奠基石和金钥匙。

创新是企业的灵魂，是企业发展的生命力，它首先体现在天卫公司员工观念的创新。公司突破传统意识，打破传统观念和意识，来打造自己的品牌。具体体现在体质创新、机制创新、管理创新等。公司在创新中发展、壮大自己，实现效益规模化，把企业建设成为更具有竞争力的企业。

全自动多工位冷镦成型设备特点介绍

01. 本机件采用严格的铸造工艺，经过消除残余应力处理，以防止使用过程中变形，长期的保持机器部件的高精度。

02. 配置高压离合器制动器，可使机器启动电流小并能实现“寸动”，“单次行程”及“连续行程”，除“寸动”方式外，机器主滑块在停车时自动停止在最后位置，以利于提供最大操作调整空间。

03. 圆周式减料模可确保材料剪断面整齐平整。

04. 压轮压料，棘爪送料采用气缸驱动，在压料轮上配防退装置，以防材料后退。

05. 与主滑块同步的前通出(阳模顶出)动作可使工件在成型后暂时留在阴模内，以免被阳模带出。

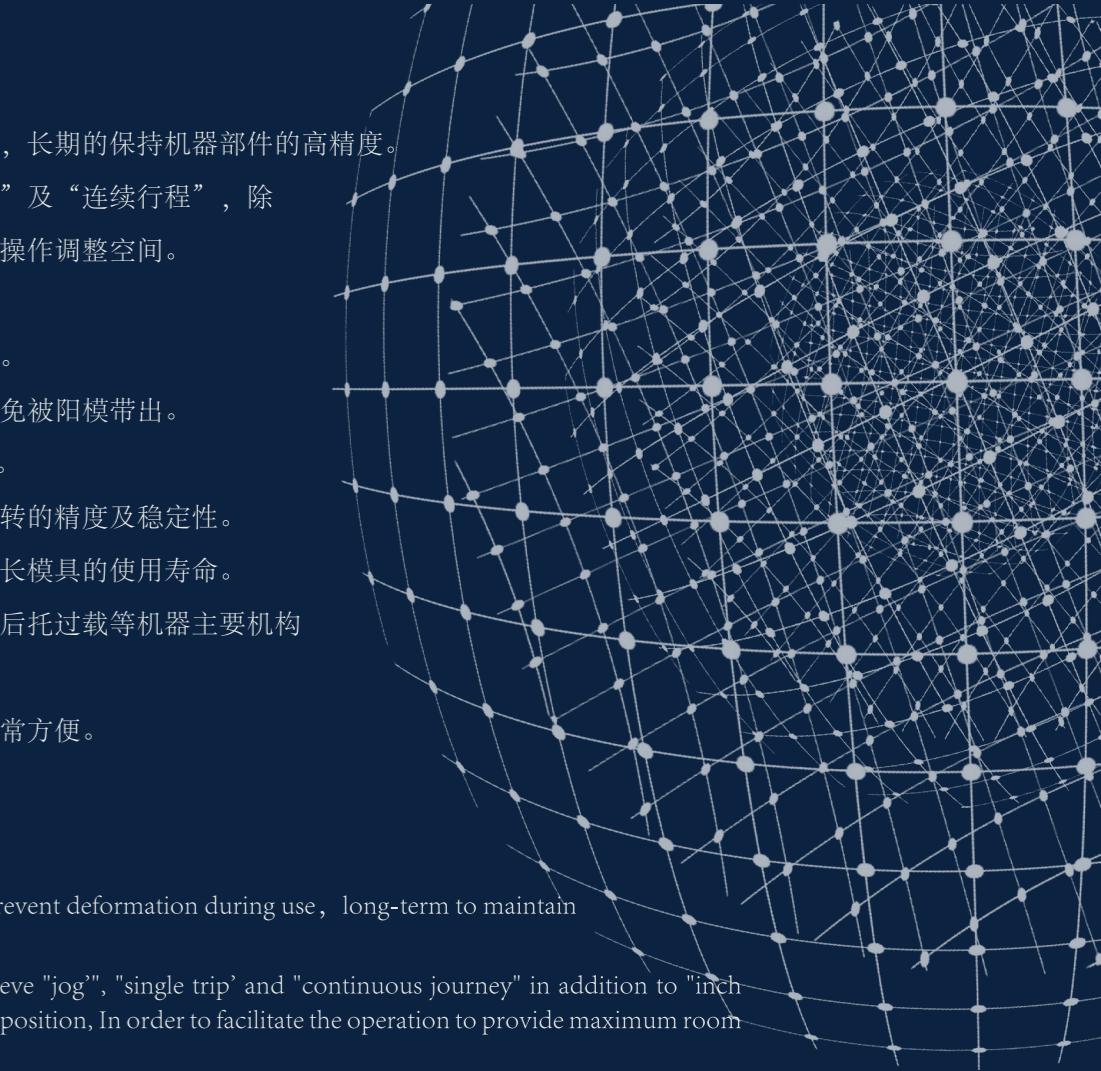

06. 主电机配置进口变频器，进口PLC控制系统，可实现机器生产速度的无级调速。

07. 各部位凸轮经电脑精确计算设计并由数控机床加工制造，从而大大提高机器运转的精度及稳定性。

08. 高强度的床身及经淬火处理的合金钢侧板，可使主滑台保持长期运动精度，延长模具的使用寿命。

09. 配备自动安全检测装置，可自动检测出短料，油压，气压高低，主机过载，前后托过载等机器主要机构工作状态及故障显示。

10. 用户要调整生产切边或者成型螺丝时，只需变换边凸轮的相位，即可实现，非常方便。

Fully automatic multi-station forming machine cold heading Introduction Features

01. The mechanical rigorous casting process, to eliminate residual stress after treatment to prevent deformation during use, long-term to maintain a high machine parts Accuracy.

02. Configure high pressure clutch brake, allows the machine starting current and can achieve "jog", "single trip" and "continuous journey" in addition to "inch Dynamic" mode, the main machine automatically stops the slider when stopping at the last position, In order to facilitate the operation to provide maximum room for adjustment.

03. Save the peripheral-type molding material can ensure that the material cut neatly smooth surface.

04. Nip pressure roller, feed pawl driven by cylinder, the nip wheel equipped with anti-withdrawal device to prevent material back.

05. Synchronization with the main front through the slider (top male die out) action enables the workpiece after forming a temporary stay in the female mold, avoid being male die out.

06. The main motor configured into the inverter, imported PLC control system, the machine can achieve production rates of variable speed.

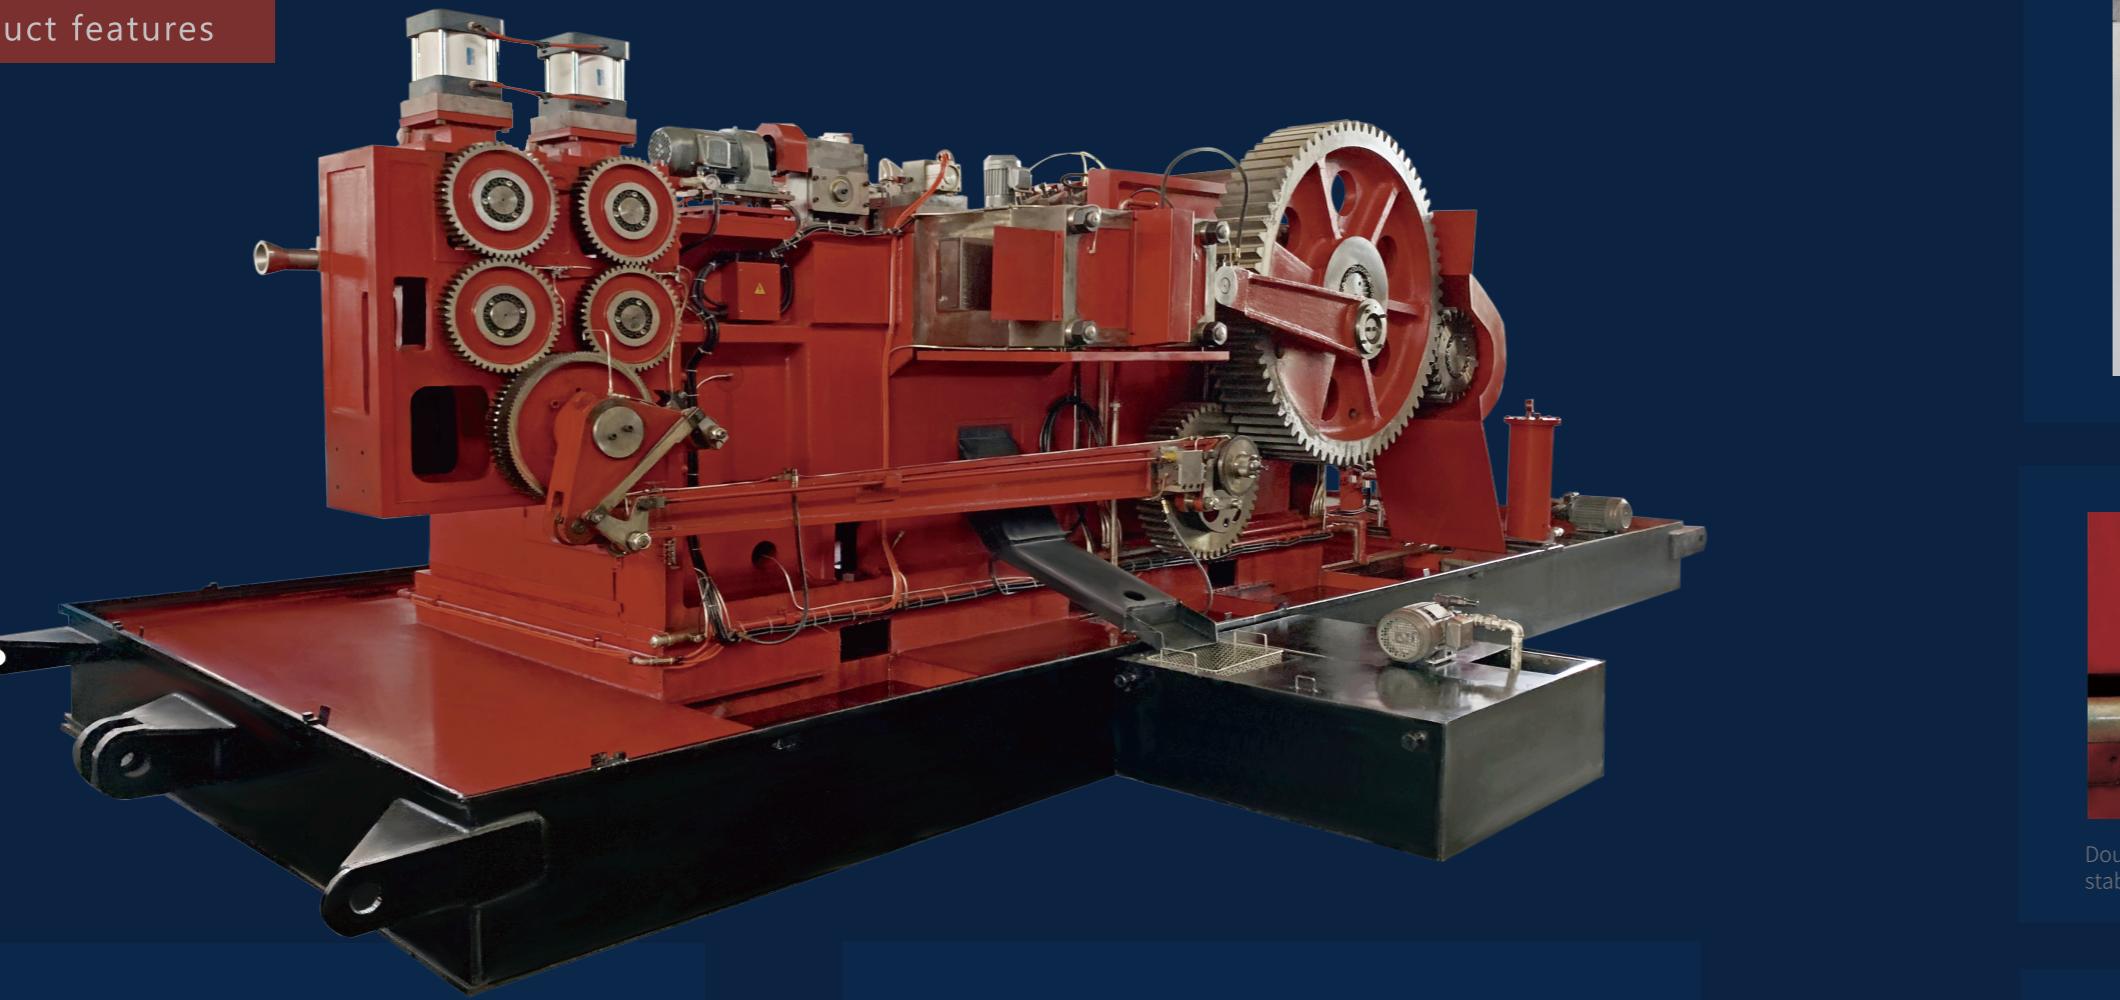

07. Each cam portion calculated by the computer precision CNC machininedesigned by the manufacturer thus greatly improving the accuracy and stability of the machine operation.

08. The high strength steel plate and bed quenching treatment, can maintain long-term master slide movement accuracy extend the life of the mold, The machine is equipped with automatic safety the main body

09. The detection device car automatically detect the short material, hydraulic, pneumatic height, host overload, overload before and after care Wor!status and fault indication .

10. When the user wants to adjust production trim or molding screws.simply transform side cam phase, it can be realized very convenient.

产品特点 Product features

后托保险装置 After the fuse holder

韩国三和压力开关控制保险,如有保险断裂,设备自动报警停车。
South Korea three and a pressure switch control insurance, if the insurance fracture, the device automatically stop the alarm.

伞齿轮传动装置 Bevel gear transmission

伞齿轮紧密配合控制传动轴传动。
Closely with the bevel gear shaft drive control.

操作控制台 Operations Console

简单便捷的操作控制台,设备状态一目了然。

Simple and convenient operation console device status at a glance.

共轮凸轮结构 Round the CAM structure

抽钳凸轮使用的双凸轮结构,来回抽钳更加稳定。

电气柜 Electrical cabinet

进口电磁阀,三联件集中控制气动压
力系统,调整简单,方便。

Import solenoid valve FRL centralized pneumatic pressurecontrol system,
adjustment is simple and convenient.

总电路控制箱

Total circuit control box

总电路控制箱配备进口plc,变频器,对电力起到保护作用。

Total circuit control box is equipped with imported plc,invert,electric power protection.

三轴齿轮组合

Three axis gear combination

使用合理的齿轮比和齿轮传动,设备锻造力更大,运行更稳定。

手摇式制止座

Suppression of hand-seat

手摇式制止座可以简单方便的调节进料长度,且配备短料报警。

Suppression of hand-holder can simply easily adjust the feed lengthand
equipped with short material to the police.

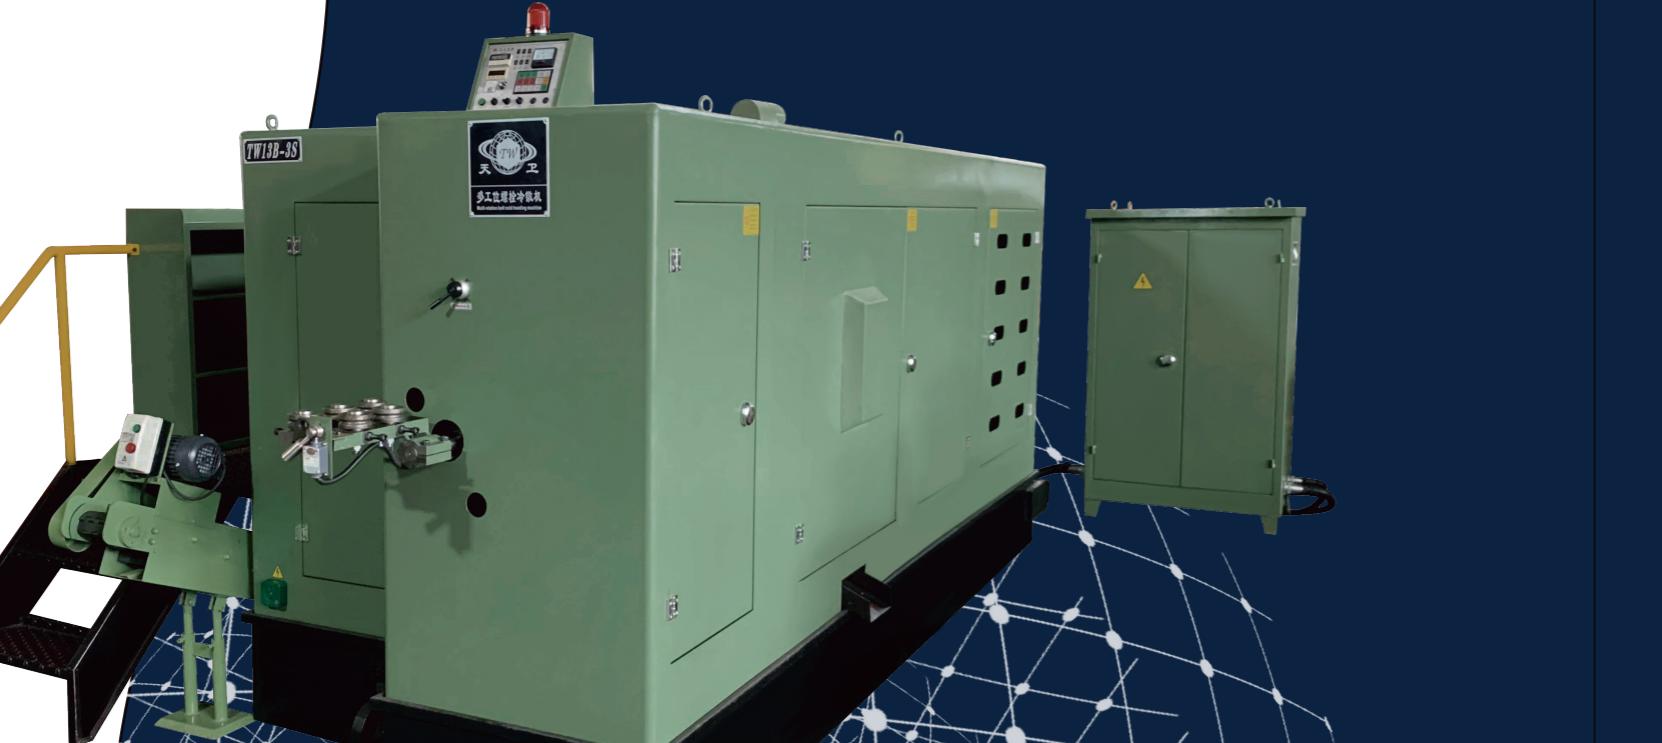

Production workshop

生产车间

三模三冲 多工位螺栓冷镦机

品质机械制造商

三模三冲多工位冷镦机采用冷拨盘元件或棒状材料,攻丝后变成轻质六角形螺母。冷镦机为卧式,工位按水平排列。送料、切料、钳料、冷镦全过程均自动进行。

The the third mock examination three punch multi station cold heading machine uses cold dial elements or bar shaped materials, which become light hexagonal nuts after tapping. The cold heading machine is horizontal and the workstations are arranged horizontally. The entire process of feeding, cutting, clamping, and cold heading is automatic.

Three die three punch cold heading machine

四模四冲 多工位螺栓冷镦机

Four die four punch cold
heading machine

品质机械制造商

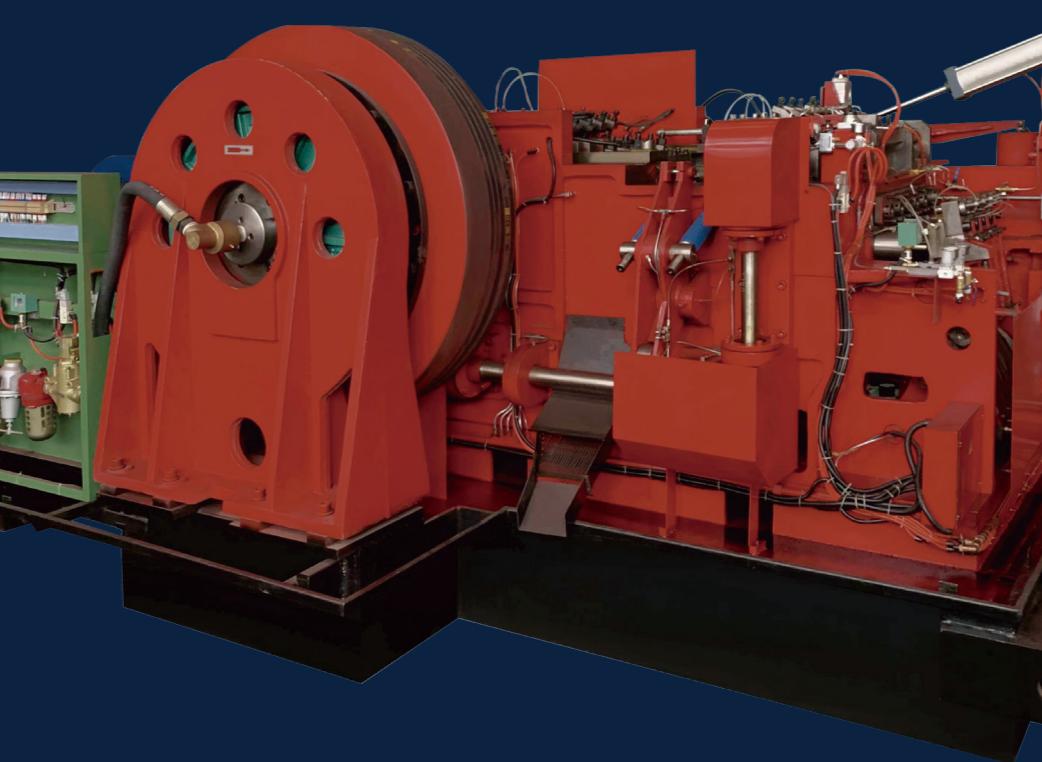

冷镦机金属零件加工成型，原本需要机械多工序切削加工，而采用冷镦方式，则可尽量少切削或不切削，进而直接成为人们想要的形状和尺寸，不仅节省大量材料，而且大幅度提高生产效率，显著提高机械强度。

The processing and forming of metal parts in cold heading machines originally required multiple mechanical processes for cutting. However, using cold heading can minimize or eliminate cutting, and directly shape them into the desired shape and size. This not only saves a lot of materials, but also significantly improves production efficiency and mechanical strength.

Fully automatic multi-station
cold heading machine

全自动多工位冷镦机

机体使用电气结合控制，使设备操作简单，运行平稳，报警灵敏，停车快速等特点。配置高压离合器制动器，可使机器启动电流小并能实现“寸动”，“单次行程”及“连续行程”，除“寸”方式外，机器主滑块在停车时自动停止在最后位置，以利于提供最大操作调整空间。

Machine is controlled by the collaboration of air and circuit which make it easy to manipulate, running stably, alarm sensitively, stop quickly, etc. The high pressure clutch allow the machine to start with a low current and do jog, one time movement, and continuous movement. Except the jog mode, the main slider will stop the end position when stop the machine, which allow the technician to adjust the machine with enough space.

五模五冲 多工位螺栓冷镦机

Five die five punch multi station
cold heading machine

品质机械制造商

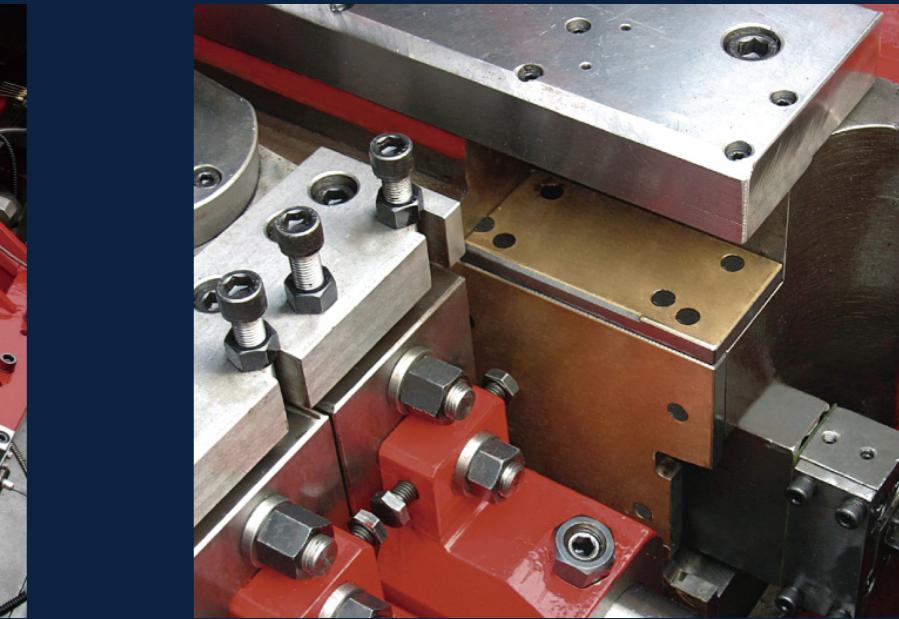

本机件采用严格的铸造工艺经过消除残余应力处理以防止使用中变形长期的保持机器部件的高精度。

This machine part adopts strict casting process to eliminate residual stress, so as to prevent deformation during use and maintain high accuracy of machine parts for a long time

Fully automatic multi-station
cold heading machine

全自动多工位冷镦机

高精度主滑块连接后翼设计，使其运行时稳定准确，前后翼采用专业抗磨锡磷青铜（选配），长期确保精度，增长使用寿命。分体独立式前通出设计，每个前通出工位可单独调整并配备有通出力检测系统，在通出力过大时会自动停机报警。

The high precision slider is connected with the rear bracket, which allow it running stably and precisely. The front and rear bracket is made of tin-phosphor bronze (optional). This material assure the accuracy of the main slider in long-term. Force detection system is installed for each independent front strok station. When the force is too high, the machine will stop and alarm.

六模六冲 多工位螺栓冷镦机

品质机械制造商

六模六冲多工位冷镦机在各个方面有很大的提升。专业针对汽摩配件、异形件、拉孔非标件的产品成型。

The six die six blow cold heading machines are greatly enhanced in every aspect. This series is designed specifically in the production of auto & motorcycle parts, irregular parts, broaching non-standard parts.

Six die six punch multi station cold heading machine
